

Mai 2008 - May 2008

• *The Bigmow, star of the stadiums*

One year after a very successful first installation on the training pitches of the A.S. Nancy (FR) football club, a Bigmow was installed on a training pitch of the DSC Arminia Bielefeld (DE) football club as well as that of TSV Timelkam (AT). The installations then took on an incredible rhythm:

- Godega Sant'Urbano (Treviso - IT)
- Orsago (Treviso - IT)
- Vidor (Udine - IT)
- Gazzo Padovano (Padua - IT)
- Ponte nelle Alpi (Belluno - IT)
- Udine (IT)
- Merlara (Padua - IT)

DSC Arminia Bielefeld

A grass hockey pitch in Italy has also been equipped with a Belrobotics robot.

• *The Bigmow sets off at Brussels South!*

Since October 2007, a Bigmow has been in the test phase at Charleroi-Brussels South airport in an area where the radars and other navigation assistance systems for VOR planes are situated, in order to measure possible "machine → airport system" and "airport system → machine" disturbances. The results so far are very positive: no disturbance has been revealed. The history of the machine is equally positive: just one breakdown due to a station power cut has been recorded.

The tests will be carried out on ILS antennae (approach assistance).

• *The Ballpicker, programmed ball collector*

Four golf courses have chosen our solutions in Belgium. The golfers who frequent the Bercuit, Boisfort, Sept Fontaines and Houthalen golf courses are now used to seeing our robots trailing about, and to appreciating their silent operation.

Sept Fontaines Golf Course

• *Living Tomorrow*

Since May 2007, two Parcmows have looked after the gardens of "La Maison du Futur" (The House of the Future) in Grimbergen (BE).

• *2008 Publicity campaigns*

After some tests carried out in the audiovisual publicity in 2007, a new effort will be made to improve the publicity shots to appear in the magazines this year.

# NEWSLETTER

- *A look back at the year 2007*

- Release of the 500<sup>th</sup> robot from the Belrobotics workshops.
- 2007 turnover doubled in comparison with 2006.
